## HAIR BOTOX

## What is Hair Botox?

Hair Botox is an advanced hair repair, anti-aging and smoothing treatment that repairs damaged and broken hair fibers. A powerful concentrate of active ingredients including Caviar Oil, Amino Acids, Natural Proteins and Argan Oil. This treatment guarantees to moisturize, nourish, repair and revive hair right from the very first use.

A decorative border of glossy, pink, spherical beads runs vertically along the right side of the page. The beads are of varying sizes and are arranged in a slightly irregular, cascading pattern. The background is a light, neutral color, and the text is presented in a clean, sans-serif font within a white rectangular area.

Hair Botox adds incredible shine and softness and helps to eliminate frizz. The results are progressive and cumulative as the quality of the hair becomes healthier and improved after each application. Our Hair Botox treatment is formaldehyde free and completely safe to use for all hair types, lengths and hair colours including women after starting their third trimester.

### **Key Benefits:**

- Eliminates frizz
- Reduces styling / drying time
- Restores damaged hair/ends
- Smooths hair & creates natural shine
- Stimulates new hair growth
- Intense hydration
- Helps with dandruff & oily scalp
- Repairs split ends
- Keeps natural curl pattern
- Suitable for very damaged hair
- Increased flexibility & elasticity

# What is the Process?

Your Hair Botox or Express Hair Botox treatment starts with an in depth consultation where our stylist analyzes your current hair texture, length and overall health. We map out your desired final result and determine which products are right for you.

Next we head to the sink to clarify and remove all build up living on your scalp and hair strands. We may be shampooing 3 times to make sure your hair is squeaky clean.

Then in the styling chair we will remove all excess water and apply your Hair Botox treatment from root to tips. You will sit under the hood dryer for up to 60 mins so make sure to bring your phone or a good book with you.

After the dryer we go back to the sink to wash your treatment out. Then it's over once again to the styling chair where you will receive a good round brush blow dry and flat iron to seal your treatment in. Voila! Your treatment is done and now you can enjoy weeks of easy to style frizz free hair.

# Before & After

**Express Hair Botox: Virgin hair. naturally curly, firzzy and thin.**

**Hair Botox: Prelightened hair, naturally wavy, frizzy, medium texture.**

# Treatment Pricing

Service	Above Shoulder	At Shoulder	Collar Bone	Mid Back	Waist Line

## Intro Offer

### Hair Botox or Express Botox

Book the Hair Botox treatment of your choice by May 15th 2022 and receive \$25 off your first treatment. This offer is not redeemable for any cash value.

# Terms & Conditions

A \$50 deposit is required to book your Express Botox treatment. A \$100 deposit is required to book your Hair Botox treatment. This deposit will count towards the final cost of your treatment.

Failure to cancel your appointment within 48 hours will result in the loss of your deposit and a new deposit will be required to rebook.

There is a very small possibility that treatment won't work to full extent on your hair due to individual nutrition intake, hormonal level, previous hair treatments, bleaching/colouring and hair care products that you previously used.

Unfortunately, the results cannot be predicted 100% . Hair treatments like any other cosmetic procedures do not work the same on everyone.

Want to know more? Book a consultation or ask your stylist at your next appointment,

# Frequently Asked Questions

## **Can I colour my hair?**

Yes, you can colour your hair but we suggest waiting 2 weeks after treatment. Express Botox can be done the same day as any colour service.

## **When can I wash my hair?**

You can wash your hair after 24 hours.

## **Do I always have to wear my hair straight?**

No, after your first wash you can blow dry, flat iron, curl or air dry as desired.

## **How long can I expect to be in the salon?**

Express Botox: 1 - 2 hours

Hair Botox: 3 - 4 hours

## **How long will my Botox treatment last?**

Express Botox: 4-6 weeks using proper after care

Hair Botox: 3-6 months using proper after care.

## **Can I receive a Hair Botox treatment if I have previously done a keratin or Japanese straightening treatment?**

Yes, Hair Botox has no harsh chemicals to cause any issue with previously treated hair.

### **Can I use Olaplex and Hair Botox?**

No, Bond builders create a barrier that can prevent Hair Botox from penetrating the hair fibre. If you wish to try Hair Botox and are already using Olaplex, (or another bond builder), please stop use for at least 3 months (ideally 4) to allow the bond builder ingredients to dissipate.

### **Can I use my current shampoo and conditioner?**

Using shampoo and conditioner that is specially formulated for long lasting of hair botox treatment is recommended. Avoid products that have: **Sodium Lauryl Sulfate, Sodium Chloride & Sodium Laureth Sulfate.**

### **Can I use my current styling products?**

Yes, after receiving your hair botox treatment you can use any styling products preferably without alcohol.

### **When can I get another treatment?**

You can repeat it as many times as you want but we would suggest 1 -2 weeks before reapplying.

### **Will hair botox affect my hair colour?**

Yes, regular hair botox may (or may not) shift your natural hair colour or professional colour hair up to 1 level lighter. This shift can be corrected by booking a hair colour appointment or by using a toning shampoo/conditioner. Express botox will not shift your natural or professionally coloured hair.

### **Will this make my hair completely straight?**

No, you will receive frizz free hair, but for those with curly hair it will loosen the curl up to 60%. For completely straight hair a keratin treatment may be for you.

### **What is the difference between hair botox and keratin treatments?**

Keratin treatments are chemical treatments that often contain formaldehyde to “lock” hair strands into a straight position to help keep them smooth. Hair Botox, on the other hand, is a deep conditioning treatment that does not use chemical reactions to work. Hair botox will heal your hair and even encourage it to grow whereas keratin treatments will straighten and smooth your hair. Our Express Hair Botox treatment has similar advantages as regular hair botox, however the effect are not as long lasting.

### **Can I go swimming?**

The longevity of the treatment will not last due to the exposure to salt and chlorine. You can help to protect your treatment by using a hair mask or serum to ensure a barrier of protection.
